### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/1/2007 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the suction operation of holding element (7) turning in the direction of the arrow shown in figure 1 to cause the suction cup to engage its surface, does not reasonably provide enablement for rotating attaching element 1 in the direction of the arrow A in figure 6. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

There is no discussion in specification of how such operation of turning of the attaching element 1 in figure 6 in the direction of the arrow A will cause the attaching element 1 to be attached to a surface. Examiner originally thought that the attaching element was member 7 in figure 1. However, a further reading of the specification indicates that is not so.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant's amendment filed June 1, 2007 to claim 10 remain vague and indefinite as lacking antecedent basis for terms such as "said tool holding element" recitations on the last five lines of the claim 10 or whether "a surface" recited in line 3 is the same surface as the surface recited in claim 9, line 3.

Applicant's arguments filed 11/9/2007 have been fully considered but they are not persuasive. Applicant's request to refund the money is not proper. It should be petitioned. Furthermore, applicant's amendment after final did not place the application in condition for allowance as indicated in the advisory action. Even if the advisory action was sent out in time, who's to said that applicant will place the application in condition for allowance thereafter. As discussed above, the application is not in condition for allowance. Indication of allowability of the claims cannot be given at this time due to the ambiguities discussed above.
